CS2013: Project Deliverables and Marking Scheme (Year Two)

The second year students are to provide the following three deliverables **by 4pm on Friday 6th April 2018** as follows:

- Hard copies of all the documents are to be submitted to the reception of the School of Computer Science & Statistics
- There is no need to submit a hard copy or CD of the code bundle
- Soft copies of the documents and zipped code bundle to be submitted through Blackboard

1. Software system - Source code bundle containing:

a) README file detailing what is in the source code bundle

b) Source Code files with the bundle

c) Deployment file detailing:

    a. details of how to install;

    b. what software package dependencies

    c. walk through video with main use cases showing the operation of the programme.

2 Development report

A Development Report is to be prepared collectively by all of the second year students of the group using the template provided.

3 Individual reflective essay

Each student must individually prepare a Reflection Document (1 – 2 pages) that reflects on key learning moments of the experience. These could include the following areas:

- The experience of working in a collaborative project team
- Individual instances of issues or dilemmas
- Contributions to the project you are proud of
- Realisations about your own working and learning styles

Please ensure your name and student number is clearly marked on the document.

4 Attendance and participation

Attendance to lectures and to the group meetings is compulsory and will be recorded. Any students with a total of three or more tutor unexcused absences to lectures or group meetings, will receive a zero grade for the next submission.

Marking Scheme

- Development report   35%
- Quality of the software system   35%
- Individual reflective essay   20%
- Attendance and participation   10%
